PROJECT STATEMENT:

Chatbots are virtual advisors, consultants or assistants whose task is to talk to an internet user in real-time. However, they conduct conversations without human intervention.

In reality, they are computer programs equipped with special algorithms that enable conversation and activities related to your needs.

PROJECT OBJECTIVES:

1) Mental Health Support for Everyone.
2) Helping users self-manage stressors by blending AI-guided listening with professional expert support.
3) Anonymous, always available, clinically safe.

TOOLS:

1) Dialogflow (API.AI).
2) python
